

CITY FACILITIES COMMITTEE
FOLLOW-UP QUESTIONS FOR DEPARTMENTS

Communications and Technology Management

What is the expected timeline for planning, design, and construction of the parking garage?

Based upon the Design/Build process utilized by the Public Works Department, the current estimate is 3 to 4 years to construct the parking structure.

When does CTM expect to have a firmer idea of the partners that will pay into the project?

We are actively discussing this effort with our partner agencies and anticipate having this information by end of this summer.

What is the expected timeline for planning, design, and construction of facility expansion?

Based upon the Design/Build process utilized by the Public Works Department, the current estimate is 5 to 6 years to complete the facility expansion.

When does CTM expect to have a firmer idea of the partners that will pay into the project?

Our process for the facility expansion is to validate the space needs of the partner agencies over the next 8 months. After that validation is completed, we will be able to provide partner agencies with a cost share budgetary estimate.
